# PROFILE

As a UX Designer, I care about the process of searching for solutions to problems. I enjoy how free and exploratory wireframing and prototyping can be. It expands the mind to look beyond the scope.

## EXPERIENCE

#### **Apprentice**

Bloc / June 2019 - Present

At Bloc, I was introduced to industry best practices and design process standards, while focusing my studies in UX Research, Visual Design, and Frontend Development. I worked with a senior product designer to create and release projects out while working with new tools and frameworks. Bloc Project Link

#### **UI Designer**

JobFlare / August 2017- January 2020

I focus on creating features to improve user engagement within our mobile application. My work involves researching and creating wireframes. Next step was applying design and creating prototypes which would then be presented in product team meetings. <u>JobFlare Project Link</u>

# **Graphic Designer**

Criteria Corp / August 2017- July 2019

I worked with the marketing team to create internal and external content. My responsibility as a designer was to brand our software as approachable and easy to use by the everyday hiring manager. Criteria Project Link

# **Lead Designer**

Furniture USA / November 2016 - December 2018

My role as lead designer was to redesign both print and digital e-commerce platforms. I worked with both the sales and engineer team to redesign the look and functionality of their website, so that current customers would feel comfortable purchasing furniture at the comfort of their home.

# **Junior Designer**

Profile Design / October 2013 - May 2016

My role as the Junior Designer was to assist the Creative Director on creating both digital and print content. One of the bigger projects that I was tasked with, was to take photos of our apparel products in our in-house studio to be placed into our seasonal catalogues.
